

State Elections in India Volume 5: Data Handbook on Vidhan Sabha Elections 1952-85: The South

These invaluable works bring together, for the first time, statistical data on all state elections held during the period 1952-1985. The authors provide data on voter turnout; vote and seat shares of political parties; and the political affiliations of the candidates. They also provide charts that allow for the analysis of the impact of changes in district and state boundaries during this period. These research and reference works are the results of painstaking, long-term effort, and will be welcomed by researchers and institutions concerned with comparative politics.
