

A World Within A World: A Fictional Biography about Carl Jung

This is a fictional biography, which goes deep into the unconscious mind of Carl Jung, one of the founding fathers of psychology. The book doesn't just graze the fields of Carl Jung's development, but it also touches upon the many concepts, which were the fundamental reasons for his fame, and downfall. It goes deep down into his motivations, and what makes all of us human, shedding light into the unconscious world, the rolling ball in the center of the universe. Carl Jung turned his mind inside out, into a juggle of perceptions, expecting every human being to hunt for the kill, in hopes of finding the line between individuality and choice. This book will hopefully not just inspire, but touch upon the fundamental emotions within us all, the ghost within the machine, and leave a bit of the universe in its wake.
