

The Ark

What if your life was on display for a judges scrutiny and every little thing you did was called into question? And what if the verdict would either save you or send you to your destruction? Thats exactly what Ransom discovers as he wakes up one day in a holding cell sealing him off from the rest of the world. He recounts his past and the strange otherworldly court, while he watches the destruction of the world outside. Seven indulgences have suddenly become his worst enemy that threatens to destroy him within his cell, while an alien invasion and a zombie apocalypse rage without. Will he survive the final test or become as the flesh eating zombies? Or will he die slowly in his cell?
