

Biological Aspects of Human Problems (Classic Reprint)

Excerpt from Biological Aspects of Human Problems This volume is based on notes begun during a trip to Egypt in 1906, when it occurred to me that a discussion of certain human problems from the biological standpoint might prove helpful to my children. It had long seemed to me that the serious student of biological processes might in time reach views respecting the mystery of life, which should throw some light on the attitude of people toward nature and especially toward other human beings. Having reached a time of life when I began to feel confidence that the laws of biology might often prove reliable guides to the understanding of puzzling situations in life, I experienced a desire to state my views to my children in a manner more definite than is possible in conversation. I am now led to publish my interpretation of biological laws in their bearing on human life in the hope that they may prove of some service to persons who have faith that an understanding of such laws is frequently a help to more intelligent and humane conduct. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
