

## Lethal Seasons (A Changed World Book 1)

In the near future, a virus has whittled down the human race. The remaining population struggles to survive in a world ravaged by extreme weather. A reticent government provides food, vaccines and keeps the ultra-fast trains running. Cities are empty, farms deserted, factories abandoned. The world is running on a skeleton crew. Nick lives at High Meadow med center. The people there stay hopeful as they work toward self-sufficiency. He counts survivors for Anguss research. He wants his life to stay as normal as possible in a world he barely understands. Wisp is a fugitive. He lives off the land, moving from town to town, hiding his extrasensory skills. He is a Finder and will accept the right kind of job. Silence and subterfuge keep him alive. Lily is a young girl with long brown hair and eyes the color of ripe cherries. She is searching for her brother. They were separated while fleeing armed men. She is part of something that started before her birth. When these three lives intersect, a chain reaction of death and violence will change the course of the future and impact the very survival of the human race.
