

# Dialectics and Ideology in Psychology: (Publications for the Advancement of Theory and History)

The book represents the first attempt to summarize the major factors in the ongoing debate on ideology and psychology. The contributions on historical development focus on concrete research areas, and show the importance of the social context and ideology in the development of psychology. The contrast between positivist and dialectical psychology is a major contribution reflected in many of the chapters. Suggestions are also made for new alternatives to assist in the orientation of psychology.
