

Materials for Engineering

Materials for Engineering will enable students to gain a clear understanding of * the properties and testing of materials * the relationship of the properties and microstructure of the materials * the recognition of how properties can change under modifications in composition, structure and processing * the selection of materials for particular applications * a sound knowledge of the requirements for safe procedures. A clear accessible text is supported by learning summaries, numerous examples, and plenty of practice questions (answers supplied). The level is suitable for a wide range of pre-degree courses including Advanced GNVQ and BTEC National.
