

RFF Environmental and Resource Economics Set

For almost 60 years, RFF has pioneered the application of economics as a tool to develop more effective policy about the use and conservation of natural resources. It remains the world's premier institution for the study of environmental economics. This collection of eight books represents many of the best works that RFF has published, including writings by Nobel Prize winning economists. The RFF Library Collection brings back landmark books published by Resources for the Future throughout its nearly 60-year history as the pre-eminent research institution devoted exclusively to environmental issues. The Collection offers individuals and institutions the most classic and relevant literature across a range of environmental issues.
