Elixir

Orphaned twins, Willow and Ivy, have been dreaming of a happier life for as long as they can remember. After Willow comes across her biological parents picture in an internet search, her and Ivy make plans to run away from their abusive foster family, but never make it past the bus stop. Sucked into a magical realm, Willow and Ivy are plunged headfirst into an adventure taking their lives in a different path. The only way back home is through a portal which only opens with a magical elixir. But three elusive ingredients are required to brew the elixir. Together, as they desperately try and find the ingredients, they face a man-eating worm, living skeletons, and strange forests while balancing first loves, tough choices, and a ridiculous number of frogs. With the help of a wizard for a guide, their childhood friend Theo, and a Warlock of dubious intentions, will they be able to find their way back... Or is staying in this new world the best decision after all?

Laravel Elixir - Laravel - The PHP Framework For Web Artisans This is a subreddit dedicated to the Elixir programming language. Anything related to Elixir is welcome here. Please read the rules before submitting content. **Installing Elixir - Elixir** Elixir is a dynamic, functional language designed for building scalable and maintainable applications.
