

Executive Report on Strategies in Russia

This report provides a strategic profile of Russia. It does so by compiling published information that directly relates to latent demand and accessibility. The reader new to Russia can quickly understand where Russia fits into a firm's strategic perspective. In what follows, Chapter 2 is a general evaluation of the accessibility of Russia, with particular focus on investment and business conditions. In Chapter 3, I report my findings on the real economic potential, or latent demand, represented by Russia when defined as an area of dominant influence. Chapter 3 is followed by trade indicators for key industries, categories, and products in Russia.
