

How I Make Money Woodworking: Developing A Product

For the price of only a few 2x4s, you will learn many of the valuable lessons that took me years of hard work and tens of thousands of dollars to discover. I am blessed to have been able to create a source of income while also living my life exactly the way I want to. Ive been asked by a lot of subscribers from my Youtube channel, The Homestead Craftsman, for advice on how to point their lives in a similar direction. Through responding to, and helping guide, a good deal of my subscribers Ive learned many people are not living the life they desire. Thats when I decided to put this book together as part of a comprehensive series. In this book, I first introduce the idea of a business centered on a single product, then I focus on the Formula for creating a successful product. The formula is simple: skill set, available market, available materials and available time. As reference and for context, I also break down my business into subcategories under the section entitled, Available Time. My goal is simple - to help people develop a business that leads them towards a more independent and fulfilling life. If you think this book would be helpful for someone you know, send them the link or consider buying them a copy. The books length will vary depending on the device you are viewing it on. As a reference, it is about 10 typed pages in a word document. For more information visit The Homestead Craftsman on Youtube. Thank you for your time and interest.
