

Wanted (an Ell Donsaii story #10) (Ell Donsaii Stories) (Volume 10)

Wanted is the tenth of a series of near future SciFi/Thrillers whose young heroine Ell Donsaiis nerve mutation makes her a genius and provides astonishing athletic abilities. In Wanted, President Stockton continues her efforts to imprison Ell in order to protect the world from some of Ells dangerous new technology. While the President rightfully wants this technology to be restricted, she wants it to be controlled by the government. Ell doesnt want even the government to have the terrible destructive potential of a technology that can cut through absolutely any material in the world! When the FBI and CIA prove to be unable to find and capture Ell, the President instructs them to imprison Ells friends. However, the President hasnt considered just how many technological advantages Ell would have in any effort to spring her friends from prison.
