

## Social Development in Hong Kong: The Unfinished Agenda

Social Development in Hong Kong: The Unfinished Agenda introduces the Social Development Index, the unique model used to measure Hong Kongs social development changes, and offers an in-depth assessment of the major findings resulting from its application. With twenty-four chapters written by local specialists, the volume reports on progress in critical sectors such as health, education, housing, transport, arts and culture, and science and technology, and also assesses Hong Kongs response to the social development needs of vulnerable population groups such as children, youth, the aged, women, and people living in low-income households.
