

Crazy Cheap Gobar Decks and Dishes: A detailed guide to building gobar decks and dishes for less than \$25 dollars, with simple tools.

Do you have the itch to build an acoustic guitar? Have you built one using the traditional million clamps, a wish and a prayer method? Have you been less than satisfied with the convex shape of your guitars back? Have you really wanted to spend \$400+ dollars on a go-bar deck and dishes, but didnt have the money, or didnt know if it was worth the investment? Me too. So, I found a better way! In my book, I describe an easy to build, easy to use, and adjustable gobar deck and a simple method for building gobar dishes. If you have a router, a ruler or tape measure, and basic hand tools (screwdriver, drill, saw, etc.) you can build this gobar deck and a couple of dishes on a Saturday morning, and be clamping your guitar braces by lunchtime!
