

The Art of Fixing Things, principles of machines, and how to repair them

You may not have realized it yet, but survival is now the new normal for many families. There was no nuclear war, super disease, or mutant virus, just years of junk products that has left many of us broke and dependent on others. This is the book you must read before you read any other how-to guide to repairing cars, household appliances, garden machines, and farm equipment, or doing home improvements. It is a resource for smart people who have never had the opportunity to learn the basics of tool use, maintenance and repairs. It contains useful information not found in any other publication, and is the first new book in many years on this subject. Written by the third generation, in a family of self-reliant do-it-yourself people, many of these 150 Tips and Tricks come to you from a time when we repaired our possessions, rather than throwing them away. For the complete beginner, and the more experienced home repairer, it contains 185 crisp black and white photo illustrations, direct, and simple explanations, and easy to follow directions, for doing repairs, and making things last longer. The information presented in this book will give you the courage, and information, to tackle simple and complex repairs. In this book, find out HOW TO: * Get your car to start. * Sharpen scissors, blender blades, pruning shears, lawn mower blades. * Start that lawnmower in the spring and snow blower in the winter. * Make new threads. * Get your fax machine, or copier to work better. * Hold a screwdriver, hammer or pliers. * Fix things with random parts. * Persuade your car's engine to last longer. * Make fittings leak proof. * Tighten and loosen things, without damaging the machine. * Find the best appliances at the best prices. * Repair household lamps and appliances. * Buy the right nuts and bolts. And much more. IT IS EASY, YOU CAN DO IT !
