

The Evolution of Mind (Classic Reprint)

Excerpt from The Evolution of Mind
The five years of continuous scientific activity which have passed since this work first appeared have not furnished any evidence that modifies the conclusions it offers, or any part of the argument on which those conclusions rest. If we were to believe some of the statements made by contemporary religious observers, those five years have seen a great change, or the culmination of a great change, in the attitude of the modern mind. Materialism has gone out of fashion, they say, and spiritualism has prevailed over the temporary impatience or rebellion of science. If any substantial change of this nature had in reality occurred, it would be foolish to present this work without modification to a new circle of readers. But the transitory popularity of the works of Professor Bergson - a popularity chiefly founded on his high literary qualities and not encouraged by our philosophers - neither constitutes nor indicates such a change. Materialism was never in fashion; and Agnosticism, which was the fashion in the mid-Victorian days to which these writers refer, is more fashionable than ever. About the Publisher
Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com
This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
