

The Tree Doctor

A story about the life of a family who move from London to the country and in particular their teenage son and how he struggles to cope with fitting in whilst also coping with a new love interest. The story hits a time shift twist and follows the lives of the family as they deal with the problems this brings. The main character tries to help the family and has an idea of what they are going through. The book also gives answers to the problems encountered by the son and the family.
